

บทคัดย่อ

The UniNet is a part of the office of the National Higher Education under the service of Ministry of Education. Nowadays, UniNet has a duty to give the internet service for the joined project educational institutions. Meanwhile, each institution will get the different IP Address, then the checking of IP Address is hard to know where is the got institution distribution. Sometime, the IP Address of some institution commits the illegal against the law on other network is also informed to the UniNet. So, UniNet has manage a new system in order to give service in Network Security System together with Phishing, Attack, Spam and Bittorent of each UniNet's institution member the system will collect the informed IP Address data of the institution which has lean attacked other network. For the checking data and analyzing the cause and tendency in using of each institution, Insert, Edit, Delete and View are collected by the system in order to serve for the UniNet officer's using conexniently us fost as nossible.
